Date	By	Sector	Rate	Δ	Type
09 April 2025	USA	All Goods	145%	+91	Escalation
14 May 2024	USA	EVs	100%	+75	Escalation
03 July 2023	CHN	Gallium, Germanium	100%	+100	Export Restriction
01 December 2023	CHN	Graphite	100%	+100	Export Restriction
09 April 2025	CHN	All Goods	84%	+50	Retaliation

Key Findings

- US-China tariffs peaked at 145% in April 2025, among the most severe escalations in modern trade history.
- SSE Composite has consistently underperformed the S&P 500 since 2018, with deeper and more frequent drawdowns throughout both trade war periods.
- The 2025 US trade deficit reached approximately -\$932B, the widest gap in the dataset, continuing a multi-year widening trend.
- CPI inflation peaked at 9.0% in 2022, consistent with the global post-pandemic inflation surge.
- Despite escalating tariffs, total US trade volume still grew at a ~4% CAGR from 2018-2024, disruption didn't reverse overall trade growth, it reshaped its composition.
